Light Bars

Product Catalogue

Britax PMG Limited is a world-class supplier of mandatory and auxiliary vehicle lighting, amber hazard warning lighting and rear view mirrors to both vehicle Original Equipment Manufacturers (OEMs) and the commercial vehicle after market. Our equipment can be found on all types of vehicle, including cars, vans, trucks, trailers, tractors, buses, coaches, recovery trucks and construction machinery.

Our quality range of beacons, lightbars, lamps, reflectors, switches, mirrors and wiper systems are sold all around the world through a comprehensive network of distributors. As part of the ECCO Safety Group, the company has access to manufacturing facilities in nine locations on four continents, along with an additional four international sales offices in Europe, Australia and China, together employing 900 team-members.

Choosing Your Light Bar

A quick guide to ensure that the lightbar you choose is the right one for you.

Style

MICRO A100 SERIES LED

07

Un-coloured polycarbonate lens, 277mm, available as single bolt fixing or temporary magnetic fixing. Multi-flash pattern, low current consumption.

MICRO A500 SERIES LED

07

Un-coloured lens (non R65) and amber lens (R65), 248mm, available as single bolt fixing or temporary magnetic fixing. Selectable flash patterns, low current consumption.

MINI A420 SERIES ROTATING, XENON,LED

06

Amber polycarbonate lens, 420mm with a choice of primary light sources. Rotating version is ECE R65 approved. Single bolt fixing or temporary magnetic fixing.

MINI A480 & A490 SERIES LOW PROFILE LED

06

Amber polycarbonate lens 420mm low profile to compliment modern vehicle design. A480 is non R65 A490 is R65 approved.

CODE 3 LOW PROFILE LIGHTBARS

07

Available in sizes 571mm, 914mm, 1194mm & 1473mm the range is very low profile The product is a joint Britax / Code 3 bar and can be specified in R65 approved versions.

A6SERIES ROTATING, XENON, LED

06

An extensive range of permanent fix bars in lengths, 520mm, 750mm, 770mm, 1000mm, 1250mm and 1500mm. A choice of primary light sources with illuminated sign plate.

A6 SERIES 'SPECIALIST' ROTATING, LED

12

Available in sizes 1000mm, 1250mm and 1500mm the bar can be specified with externally mounted work lamps and stop/tail/direction indicator lamps or LED warning modules.

A13 SERIES LOW PROFILE LED

08

Un-coloured or amber polycarbonate lens, low profile to complement modern vehicle design. Available in 770mm, 1000mm, 1250mm, 1500mm with dual voltage modules.

Icon Key

ROTATING

A static halogen bulb with motor driven reflector turning through 360°

XENON

High energy pulse with light being directed through a supplementary Fresnel lens

LED

Very latest technology with multi-diode modules offering high performance and low current consumption.

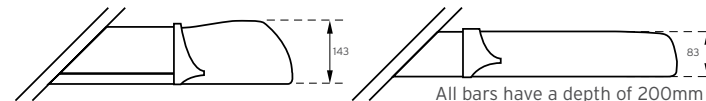

ECE REG 65

Approved to ECE Regulation 65

FAQs

Q: When do I need a light bar?

A: It is advised that an amber warning light is used in any hazardous situation where vehicles are operating outside of normally expected parameters, it is 'good practice' and will ensure compliance with health & safety guidelines.

Q: What is the fixing method?

A: Britax light bars can be specified with magnetic or permanent bolt on fixings. Magnetic options are only on bars up to 420mm and are intended for temporary use only. The product carries a speed warning which should be observed.

Q: What length light bar will I need?

A: The length of the bar will depend on the size of vehicle it is to be mounted on and the availability of a suitable mounting surface. Generally bars up to 420 mm are suitable for cars, bars 420 - 1000mm for vans and light commercial vehicles and bars 1000mm - 1500mm for heavy commercial vehicles. In all cases the bar must be mounted in strict accordance with the fitting instructions supplied with the product.

Q: Are all fixings included?

A: Yes all bolts and /or brackets are included with each bar.

Q: Do the bars meet current European approvals?

A: Yes within the range bars will comply with the requirements of ECE Regulation 65 and the latest approvals for electro-magnetic compatibility (CE mark).

Q: What is 'Chapter 8'?

A: 'Chapter 8' is an extract from the DoT document "Traffic Safety Measure and Signs for Road Works and Temporary Situations" which states that vehicles stopping on highways for works purposes or inspections shall be equipped with either a roof mounted amber warning light bar, comprising at least two independent light sources OR two independent roof mounted amber warning beacons, visible through 360°. Warning beacons or light bars must conform to ECE Regulation 65.

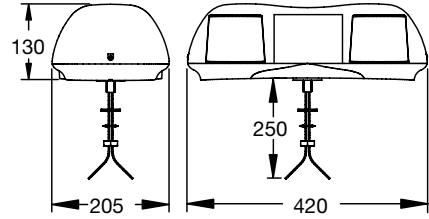

Q: Do any bars allow compliance with the UK requirement 'Chapter 8'?

A: Yes any light bar that is ECE Regulation 65 approved gives compliance with 'Chapter 8'.

Q: Is full specification information including current draw and input voltage available?

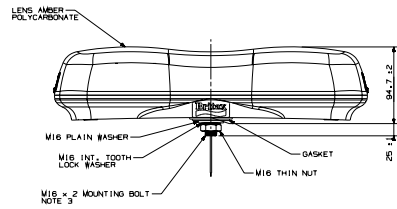

A: Yes check our website for a more detailed technical specification www.britax-pmg.com or call +44 (0)1262 670161 and speak to Technical Services.

Important Information

- Please note part numbers listed are for one set of lettering only.
- If the message is required front and rear of the bar, order quantity = 2 per part number.
- Bars with illuminated centre sections have a red dot adjacent to the centre denoting red illumination for rear facing.
- Other messages, font styles, font colours and languages can be ordered, please contact our sales team on **+44 (0)1262 670161** for more information.

HIGHWAY MAINTENANCE

The messages **ANIMAL WARDEN, HIGHWAY MAINTENANCE, MOTORWAY MAINTENANCE** are all messages that are on two lines, first word above the second.

- Sign plate lettering material specification:
 - Polymeric calendar vinyl
 - 70 micron face film
 - 5 to 7 years outdoor life.
