

Magnetic Mic helps you *stay focused* ... and safe.

You'll keep your eyes on the road during the critical moments you pick up the microphone and return it to its holder.

REPLACE THE CONVENTIONAL HANG-UP CLIP

You replace your microphone's hang-up clip with a magnetic base piece—it easily retrofits into most standard mounting locations—then slide the slotted metal disc onto the back of the microphone.

INSTALL IN MINUTES—IT'S AS EASY AS 1-2-3

All you need is **1** Magnetic Mic, a number **2** Phillips screwdriver, and about **3** minutes of time. Each Magnetic Mic comes with the necessary hardware and complete, easy-to-follow instructions.

JUST GET THE MIC CLOSE AND LET IT GO

When you're finished with the microphone, simply *get it close* to the Magnetic Mic base piece. Then just *let it go*, and the magnet guides it into place. There's no need to take your eyes off the road.

KEEP YOUR RADIO SYSTEM GROUNDED

Whether your radio system functions with an on-hook / off-hook setting, switches to a private line or scans when hung up, Magnetic Mic will work with your radio system.

The easy-to-install, universally-compatible, magnetic holder for your microphone.

Works with all microphones

MAGNETIC MIC
Stay focused

Magnetic Mic was created by an active duty police officer and is relied on by first responders across the country.

“Our fleet operates in harsh, off-road off conditions all the time. Magnetic Mic secures our microphones with ease, and we have yet to ever “drop” a mic. Most importantly, returning the microphone into position is so easy that our operators don’t have to take their eyes off the road, which improves safety.”

Chief Chris Jennings, EFO
Timberline Fire Protection District, Colo.

“In the interest of public safety, every emergency response unit, police, sheriff, fire or emergency medical services should be equipped with a Magnetic Mic.”

Captain Garth W. Hillier
Fulton County Sheriff’s Office, Johnstown, N.Y.

OPTIMIZE VEHICLE SETUP

You can install Magnetic Mic in areas considered less-than-optimal for a conventional hang-up clip. Just install it within the driver’s reach and free of any obstructions.

COMPATIBLE WITH YOUR MIC

Magnetic Mic works with virtually all radio microphones on the market today. Whether you are adding Magnetic Mic to new installs or retrofitting an entire fleet, Magnetic Mic will install with ease.

BROAD INDUSTRY USAGE

Anyone who uses a radio microphone needs to stay focused--and will benefit from Magnetic Mic:

- | | | |
|--------|--------------|---------------------------------|
| Police | Oil and gas | Agricultural |
